Focus on Success

Since the company was founded in 1931, The FUCHS Group has grown into the largest independent manufacturer of specialty lubricants in the world. Recognized internationally for its innovative lubricants and industry related specialty products, FUCHS has a global reach with manufacturing facilities in over 40 countries.

The leading-edge technology of our products, the expertise of our employees and factory direct supply channels provide the service and value our customers expect, and makes FUCHS Lubricants Canada Ltd. unique in the marketplace. FUCHS is committed to providing our customers with comprehensive solutions that suit all of your lubricant needs.

- Seven North American manufacturing facilities provide operational redundancy and uninterrupted flow of goods.
- FUCHS operates a network of warehouses to ensure local supply for timely cost savings.
- Factory trained field technicians operating locally to provide unparalleled service and expertise.
- FUCHS' portfolio offers the most comprehensive line of advanced technology products available in the industry.
- ISO 9001:2015 Registered Quality Management System

FUCHS Lubricants

Innovative lubricants need experienced application personnel

Every lubricant change should be preceded by expert consultation on the application in question. Only then the best lubricant system can be selected. Experienced FUCHS sales and technical personnel will be glad to advise on products and process optimization for the application in question.
